Explanation

Presence or absence of gene variants c.2383C>T and c.839G>A in CORIN gene, locusu Wb, causing golden coat color in Siberian cats was tested. Sunshine color is caused by c.2383C>T variant (allele wbSIB), extreme sunshine is caused by c.839G>A variant (allele wbeSIB).

Dominance of alleles was established as follow: Wb > wbeSIB > wbSIB. Wb allele is not related to golden coat color. Genotype wbSIB/wbSIB is carried by sunshine cat, genotype wbeSIB/wbeSIB is carried by extreme sunshine cat, genotype wbeSIB/wbSIB is carried by extreme sunshine cat a carrier of sunshine. Variants of Wb locus are inherited autosomally recessively.
